

Hugo Newsletter | November 2018

Welcome to the fifth issue of the Hugo Newsletter! This monthly newsletter covers everything happening in the world of Hugo and static site generators. As always, we're looking for feedback. Please contact us on [Twitter](#) or email me (Ricardo@Feliciano.Tech) to tell us what you like and dislike about the newsletter so we can make it better for future issues.

As usual, there's been some new themes and blog posts this month but the highlight is clearly the Hugo v0.50 release. Hugo error messages now show up in-browser. This is a very UX focused feature that really brings Hugo over the top. Did I mention that the build speed and RAM usage also lowered? Thank you to "bep" and team for a great release. I'm forever impressed.

- Ricardo (FelicianoTech)

Hugo Releases

v0.49.1 - [release notes](#)

- fixed bug with resources.Concat
- fixed Scratch append bug

v0.49.2 - [release notes](#)
